

FINOVA Finance App – Design Explanation

Overview

The **FINOVA Finance App** is a mobile financial management application designed to help users monitor their income, expenses, transactions, and financial performance through an intuitive and user-friendly interface. The prototype consists of **seven interconnected screens** that guide users from onboarding to financial analysis. The design follows modern UI/UX principles, using a clean layout, consistent color palette, easy navigation, and data visualization to enhance the user experience.

The primary goal of the application is to provide users with a simple platform for managing personal finances, tracking spending habits, and gaining financial insights.

Page 1 – Splash Screen

The first screen serves as the **splash screen** and introduction to the application.

Design Elements

- Displays the **Finova logo** and brand identity prominently.
- Includes an illustration related to finance and money management.
- Uses a **blue background**, representing trust, security, and professionalism.
- Contains a **“Get Started”** button that directs users to the login page.

Purpose

The splash screen creates a strong first impression and establishes the application's branding. It also acts as an entry point before users access the main functionality of the app.

User Flow

- Clicking **Get Started** navigates the user to the Login Screen (Page 2).
-

Page 2 – Login Screen

The login page allows users to securely access their accounts.

Design Elements

- Simple and clean login form.

- Input fields for:
 - Email
 - Password
- "Forgot Password" option for account recovery.
- Social login option using Google.
- Fingerprint authentication icon for biometric login.
- Sign-up link for new users.

Purpose

This page focuses on secure authentication while minimizing complexity. Multiple login methods improve accessibility and convenience.

User Flow

- Successful login redirects users to the Dashboard (Page 3).
- New users can register through the Sign-Up option.

Page 3 – Dashboard/Home Screen

The dashboard acts as the **central hub** of the application.

Design Elements

- Personalized greeting message.
- Current account balance card.
- Income and expense summary cards.
- Monthly overview graph displaying spending trends.
- Recent transaction history section.
- Bottom navigation menu for quick access to different modules.

Purpose

The dashboard provides users with a quick overview of their financial status without requiring multiple interactions. Important information is immediately visible upon login.

Key Features

- Financial summary at a glance.
- Spending trend visualization.
- Easy access to recent transactions.
- Navigation to all major sections of the app.

User Flow

Users can:

- View transaction details.
 - Access the expense management screen.
 - Navigate to wallet and analytics pages.
-

Page 4 – Expense Management Screen

This screen is dedicated to managing expenses and categorizing spending activities.

Design Elements

- Displays total expense amount.
- Income and expense summary cards.
- Category icons for:
 - Food
 - Shopping
 - Travel
 - Bills
- Expense history list.
- “Add Expense” button.

Purpose

The screen enables users to record and organize expenses efficiently. Categorization helps users understand where their money is being spent.

Benefits

- Better budget tracking.
- Organized expense records.
- Improved financial awareness.

User Flow

Users can:

- Add new expenses.
 - Review previous expenses.
 - Return to the dashboard.
-

Page 5 – Profile & Settings Screen

The profile page allows users to customize account preferences and manage settings.

Design Elements

- User profile section.
- Settings menu with multiple options.
- Performance and personalization settings.
- Notification preferences.
- Security settings.
- Logout option.

Purpose

This page centralizes user account management and application customization.

Features

- Account management.
- Notification controls.
- Security configuration.
- Privacy settings.

User Flow

Users can update preferences or log out and return to the login screen.

Page 6 – Wallet Screen

The wallet screen provides detailed information about the user's financial accounts.

Design Elements

- Virtual wallet card displaying available balance.
- Account list showing linked accounts.
- Quick action buttons such as:
 - Send Money
 - Receive Money
 - Transfer Funds
 - Add Money
- Transaction overview section.

Purpose

The wallet page simplifies fund management and account monitoring.

Benefits

- Quick access to financial operations.
- Better account visibility.
- Convenient transaction management.

User Flow

Users can perform financial transactions and return to the dashboard or analytics page.

Page 7 – Analytics Screen

The analytics page provides advanced financial insights through visual reports.

Design Elements

- Pie chart showing spending distribution.

- Bar graph displaying spending trends.
- Financial summary cards.
- Filters for:
 - This Month
 - Last Month
 - This Year

Purpose

The analytics section helps users understand their spending behavior and make informed financial decisions.

Key Features

- Expense categorization analysis.
- Trend monitoring.
- Comparative financial reporting.

Benefits

- Better budgeting decisions.
- Identification of spending patterns.
- Improved financial planning.

Navigation and Prototype Flow

The prototype uses interactive connections between screens to create a seamless user journey.

Main Navigation Flow

1. Splash Screen → Login Screen
2. Login Screen → Dashboard
3. Dashboard → Expense Management
4. Dashboard → Wallet
5. Dashboard → Analytics

6. Dashboard → Profile

7. Profile → Logout → Splash/Login Screen

The bottom navigation bar provides quick movement between major modules, reducing user effort and improving usability.

Design Principles Applied

1. Consistency

- Uniform color palette across all screens.
- Consistent typography and button styles.
- Similar card layouts for financial information.

2. Simplicity

- Minimalist interface design.
- Clear visual hierarchy.
- Easy-to-understand icons and labels.

3. Accessibility

- Large touch targets.
- Readable typography.
- High color contrast for better visibility.

4. User-Centered Design

- Quick access to important financial data.
 - Reduced number of steps for common actions.
 - Intuitive navigation structure.
-

Conclusion

The **FINOVA Finance App** prototype is designed to deliver a comprehensive and user-friendly personal finance management experience. The application integrates account management, expense tracking, wallet functionality, and financial analytics into a single platform. Through its

clean interface, logical navigation flow, and informative visualizations, the app enables users to monitor their finances efficiently and make smarter financial decisions. The design successfully balances functionality and usability, making it suitable for both new and experienced users seeking effective financial management solutions.
